

RK-90 Off-Line Filter

80% of failures of the hydraulic system are due to contamination. Upgrading additional filtration systems in your existing system is inadequate to prevent environmental pollution. An upgrade of filter systems is often too expensive. We offer you the comfortable and cost-effective solution with our RK-90 Offline Filter.

Technical Specifications

Operating pressure 10 bar

Operating flow 12lt / min

Engine power 0,25 kW, 1450rpm

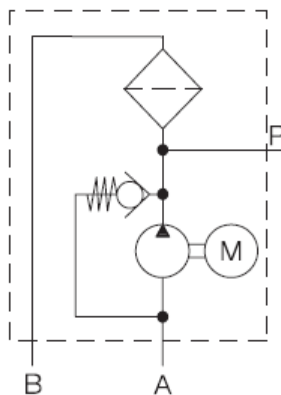

Filter capacity 260lt

Dirty capacity 180gr

Filtration value 10 microns

Filter G. 60-05
